Cleanroom Qualification Software

CROWin

Special Advantages

- significant time saving and error prevention
- supports simultaneous measurement with multiple particle counters
- support for other tests such as flow test, temperature and humidity
- free configurable time intervals
- realtime measurement and data recording, analysis and reporting
- acoustic support for filter integrity test (leak detection; scan time)

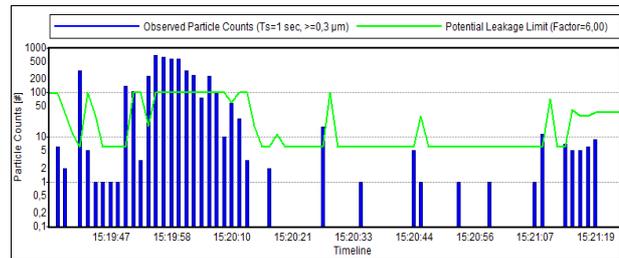

Cleanroom Qualification Software CROWin.

Principle

CROWin has been developed according to the standards ISO 14644 and GMP (*Goods manufacturing practice*) as an extension of the Particle Analysis Software PASWin. The software enables the structured acquisition, storage, presentation and analysis of all required measurements for cleanroom classification.

Supported qualification measurements

- classification of the cleanliness class
- recovery Test
- filter Integrity Test / Leakage Test
- data acquisition for filter performance
- air flow test for non-unidirectional flow
- data acquisition for difference pressure test of adjacent rooms

Counting-Statistic versus time.

Applications

- in all cleanroom areas
- evaluation of laminar flow boxes and cytostatic work benches
